EMPLOYMENTS

<i>Current</i>	Software developer, OMEGAPOINT GÖTEBORG AB	Gothenburg, Sweden
MAY 2017	Projects: Volvo On Call for next generation cars - Volvo Car AB, In-Car apps - Volvo Car AB	

<i>Current</i>	Software developer, SELF-EMPLOYED	Gothenburg, Sweden
NOV 2013	Part time IT consultant. As an self-employed IT consultant, I have gained the mindset of putting the client in focus and deliver solutions based on their needs. Projects: Webscraper for realtor - Savills Sweden AB, WrapMyInfo a secure RESTful backend - WrapMyInfo & Web application used for results - SSS Arrangemang AB.	

EXPERIENCE

<i>Current</i>	<i>Volvo On Call for next generation cars</i> , VOLVO CAR AB	Gothenburg, Sweden
DEC 2018	Technologies: C++, Swift, Kotlin Part of a small cross functional feature team that was in charge of developing features such as heater start/stop, remotely trigger car updates and scheduling of climatization in car. The cross functionality referred to us developing both the mobile apps for Android and iOS, but also to develop the telematic software running in the car.	

DEC 2018 — SEP 2017	<i>In-Car apps</i> , VOLVO CAR AB	Gothenburg, Sweden
	Technologies: C++, JavaScript, Qt Development of the Volvo Cars In-Car apps such as Internet Maps, Weather, Glympse and more. As most apps where already in production, daily tasks consisted of bug fixes and continuous improvements. Participated in rewrites of several of our apps to utilize more C++ for performance reasons.	

<i>Current</i>	<i>Webscraper for realtor</i> , SAVILLS SWEDEN AB	Gothenburg, Sweden
OCT 2015	Technologies: Python, SQLite An application to scrape information about listed estates from the realtors customers. The application compiles an Excel-sheet with all estates available for rent as well as the changes from previous run. The code was written in Python. This project gave me experience in communicating with and deliver to clients.	

DEC 2015 — AUG 2015	<i>A secure RESTful backend</i> , WRAPMYINFO	Gothenburg, Sweden
	Technologies: JavaScript, Node.js, PostgreSQL Single developer of a backend for a start up with the business to store userdata for customers. The code is written in JavaScript / Node.js, using Express.js and the database PostgreSQL. This project have increased my technical knowledge as well as my ability to deliver on a deadline.	

<i>Current</i>	<i>Web application used for results</i> , SSS ARRANGEMANG AB	Stenungsund, Sweden
NOV 2013	Technologies: PHP, Laravel Project lead, lead developer in a team of three, with the scope of 1500 hours. I worked with the back end in PHP and used the framework Laravel. I also took responsibility in keeping the service running. This project have increased my confidence in communication with clients, deliver software that works as intended and knowledge in managing services.	

EDUCATION

2017 — 2015	Master of Science in COMPUTER SYSTEM AND NETWORKS Chalmers University of Technology	Gothenburg, Sweden
