## EMPLOYMENTS

<i>Current</i> MAY 2017	Software developer, OMEGAPOINT GÖTEBORG AB <b>Projects:</b> Volvo On Call for next generation cars - Volvo Car AB, In-Car apps - Volvo Car AB & Cloud for car manufacturers - WirelessCar AB.	Gothenburg, Sweden
APR 2021 — NOV 2013	Software developer, SELF-EMPLOYED Part time IT consultant. As an self-employed IT consultant, I have gained the mindset of putting the client in focus and deliver solutions based on their needs. <b>Projects:</b> Webscraper for realtor - Savills Sweden AB, WrapMyInfo a secure RESTful backend - WrapMyInfo & Web application used for results - SSS Arrangemang AB.	Gothenburg, Sweden

## EXPERIENCE

<i>Current</i> MAR 2020	<i>Cloud for car manufacturers</i> , WIRELESSCAR SWEDEN AB Technologies: Java, Spring Boot, AWS, DevOps Developer in a DevOps team with responsibility for development, automatic testing, production deployment, operations and maintenance. Spring Boot applications running in AWS with ECS as well as AOT compiled Java (both with and without Spring Boot) in AWS Lambda.	Gothenburg, Sweden
MAR 2020 — DEC 2018	<i>Volvo On Call for next generation cars</i> , VOLVO CAR AB Technologies: C++, Swift, Kotlin Part of a cross functional feature team that was in charge of developing features such as heater start/stop, remotely trigger car updates and scheduling of climatization in car. The team developed both the mobile apps for Android and iOS, as well as the telematics software running in the car.	Gothenburg, Sweden
DEC 2018 — SEP 2017	<i>In-Car apps</i> , VOLVO CAR AB Technologies: C++, JavaScript, Qt Development of the Volvo Cars In-Car apps such as Internet Maps, Weather, Glympse and more. As most apps where already in production, daily tasks consisted of bug fixes and continuous improvements. Participated in rewrites of several of our apps to utilize more C++ for performance reasons.	Gothenburg, Sweden
<i>Current</i> OCT 2015	<i>Webscraper for realtor</i> , SAVILLS SWEDEN AB Technologies: Python, SQLite An application to scrape information about listed estates from the realtors customers. The application compiles an Excel-sheet with all estates available for rent as well as the changes from previous run. The code was written in Python. This project gave me experience in communicating with and deliver to clients.	Gothenburg, Sweden
DEC 2015 — AUG 2015	<i>A secure RESTful backend</i> , WRAPMYINFO Technologies: JavaScript, Node.js, PostgreSQL Single developer of a backend for a start up with the business to store userdata for customers. The code is written in JavaScript / Node.js, using Express.js and the database PostgreSQL. This project have increased my technical knowledge as well as my ability to deliver on a deadline.	Gothenburg, Sweden
DEC 2017 — NOV 2013	<i>Web application used for results</i> , SSS ARRANGEMANG AB Technologies: PHP, Laravel Project lead, lead developer in a team of three, with the scope of 1500 hours. I worked with the back end in PHP and used the framework Laravel. I also took responsibility in keeping the service running. This project have increased my confidence in communication with clients, deliver software that works as intended and knowledge in managing services.	Stenungsund, Sweden

## EDUCATION

2017 — 2015	<i>Computer System and Networks</i> , CHALMERS UNIVERSITY OF TECHNOLOGY Main subjects: Security and Distributed Systems Thesis: "A Security Policy for Web Navigation" — Advisor: Daniel Hausknecht	Gothenburg, Sweden
2015 — 2012	<i>Information Technology</i> , CHALMERS UNIVERSITY OF TECHNOLOGY Thesis: "Security in close proximity systems" — Advisor: Pierre Kleberger	Gothenburg, Sweden
